The invention of claim 1 does not appear to involve an inventive step based on documents 1 and 2 cited in the ISR. Applying the configuration of comparing the air temperature at the exit of the evaporator with a predetermined value and controlling start/stop of the compressor to the device of document 1 would be easy for a party skilled in the art.

The inventions of claims 2 and 6 do not appear to involve an inventive step based on documents 1 and 2 and document 3 cited in the ISR. Applying the configuration of controlling start/stop of the compressor based on if the temperature condition described in document 3 is satisfied for a predetermined time to the device of document 1 would be easy for a party skilled in the art.

The inventions of claims 3-5, 7 and 8 are neither described in any of the documents cited in the ISR nor obvious to a party skilled in the art.
